	Examiner Jose L. Couso	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Zhao et al. (U.S. Patent No. 6,243,480).

With regard to claim 1, Zhao describes presenting a physical object to an optical sensor (see figure 5, element 507 and refer for example to column 8, lines 31-33), discerning from optical sensor data an identifier associated with the object (see figure 4, element 405 and refer for example to column 7, lines 45-58, the semantic information corresponds to applicant's identifier), transferring the identifier to an indexing system (see figure 5, element 511 and refer for example to column 8, lines 38-48, the semantic digest transferred to the indexing system); and determining from the indexing system an internet address corresponding to the object (see figure 7, line 709 of the code and refer for example to column 12, lines 24-25) an improvement comprising: sending user data to a master system (refer for example to column 13, lines 19-24), the user data

Art Unit: 2621

providing information related to user location at the master system (refer for example to column 13, lines 25-27), identifying an indexing system close to the user (see figure 9, element 929 and refer for example to column 14, lines 57-67, the watermark agent data corresponds to applicant's identifying an indexing system close to the user); and transferring the identifier to the identified indexing system (refer for example to column 14, line 67 through column 15, line 18, the identifier is transferred to indexing system by the watermark verification process).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Daniele, Hecht, Ikenoue et al., Rabne et al., Houser et al., Glogau, Darago et al., Stefik et al., Pensak et al. and Zhao all disclose systems similar to applicant's claimed invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jose L. Couso whose telephone number is (703) 305-4774. The examiner can normally be reached on Monday through Friday from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Boudreau, can be reached on (703) 305-4706. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-8576.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
